

NexusIQ Corporation — Weekly Operations Digest

Week 12: March 18 – March 24, 2024

Prepared by: Operations Analytics | Distributed: Monday Mar 25, 2024 | Classification: Internal — Operations

Week Overview

Week 12 was a representative operating week with no major promotional events or demand anomalies. Gross revenue of \$3,142,840 is in line with the Q1 weekly average of approximately \$2,942,453 (\$38,241,892 / 13 weeks). The 6.8% premium over the Q1 average reflects a modest uptick in Home and Sports demand consistent with the early spring buying pattern typically observed in mid-March as customers begin home improvement and outdoor fitness purchasing.

Operations ran smoothly across all five regions. No fulfillment issues were reported. Return volume was within normal range at 112 returns for the week, representing a 5.8% return rate on 1,926 transactions — slightly above the FY 2024 average of 6.0% but within the normal operational range. Customer support case volume was 38 new cases — a standard weekly load for the Tier 1 team.

Daily Revenue Summary — Week 12

Date	Day	Gross Revenue	Transactions	Avg Value	Notable Activity
Mar 18, 2024	Monday	\$371,284	714	\$519.87	Standard Monday — Home category leads
Mar 19, 2024	Tuesday	\$354,118	683	\$518.48	Normal volume
Mar 20, 2024	Wednesday	\$482,844	928	\$520.31	Mid-week Sports promotion — email send
Mar 21, 2024	Thursday	\$558,280	1,074	\$519.79	Spring Sports campaign Day 2
Mar 22, 2024	Friday	\$693,416	1,330	\$521.37	Friday lift — Electronics
Mar 23, 2024	Saturday	\$512,018	983	\$520.87	Weekend home shopping
Mar 24, 2024	Sunday	\$170,880	328	\$521.00	Normal Sunday trough
Week 12 Total		\$3,142,840	6,040	\$520.34 avg	+6.8% vs Q1 weekly avg

Category Performance

Electronics maintained its leading position at 51.2% of week revenue, in line with the full-year average. The Home category showed early spring seasonal strength at 22.4%, slightly above its annual 20.2% share, driven by Bedding and Decor purchases. The Sports and Fitness category benefited from a targeted email campaign sent Wednesday March 20 promoting spring Equipment and Footwear lines. Clothing and Food performed at seasonal norms.

Category	Week 12 Revenue	% of Week	Vs FY Avg Share	Week's Best SKU
Electronics	\$1,609,134	51.2%	Approx FY average	Phone
Home	\$703,997	22.4%	+2.2 pts — spring lift	Bedding
Sports	\$408,569	13.0%	Approx FY average	Equipment
Clothing	\$282,856	9.0%	+2.3 pts — spring apparel	Jackets

Food	\$138,284	4.4%	Approx FY average	Snacks
Total	\$3,142,840	100%	—	—

Inventory and Supply Chain Status

Inventory positions were healthy across the network in Week 12. No SKUs reached reorder alert status during the week. The Q1 inventory review conducted in February 2024 resulted in reorder quantities being recalibrated after the post-holiday Q1 demand trough. All five regions were operating within 20% above their reorder thresholds — a comfortable buffer heading into the spring Sports and Home demand season.

The TechSource Global Electronics supply agreement was renegotiated in Week 11 (March 11-17), resulting in a 4.2% reduction in Laptop unit cost and an extended payment terms arrangement (net-45 versus the prior net-30). This negotiation was facilitated by the category team's analysis of TechSource's on-time delivery performance in Q4 2023 and Q1 2024. The cost reduction is expected to contribute approximately \$1.1M in improved gross margin on an annualized basis.

Return Processing Summary

The 112 returns processed in Week 12 were handled within normal SLA windows. Status breakdown: 24 refunded (21.4%), 22 approved pending refund (19.6%), 23 pending inspection (20.5%), 21 received (18.8%), and 22 rejected (19.6%). The rejection rate of 19.6% is below the FY 2024 average rejection rate of 20.7%, consistent with mid-year return quality improving as customers become more familiar with return eligibility criteria from the updated Returns and Refunds Policy introduced in January 2024.
